Summary

A Full Stack Engineer with the ability to write well designed and tested code in various frameworks and languages, and experience working in an Agile team. Looking for opportunities to create an impact, gain experience and diversify.

Experience

Full Stack Engineer

BlackRock

Jan 2020 - Aug 2021 (1 year 8 months)

- Developed various solutions via our legacy ticketing tool, saving 700+ hours annually.
- Led a near-complete refactor of the product, improving code coverage from 0 to 80% and cutting code-smells by 90%.
- Led a build-versus-buy analysis for the team, coordinating a feasibility exercise with external vendors and presenting analysis to various stakeholders.
- Helped provide support to the complete Aladdin ecosystem as part of the Operations Team.

Intern

Schneider Electric

May 2019 - Jul 2019 (3 months)

- Developed POC for shifting existing services to a bare-metal Kubernetes cluster.
- Provided path-based routing and metrics collection via Voyager and Prometheus.

Education

Manipal Institute of Technology

B.Tech, Computers and Communication

2016 - 2020

Grade: 8.63 / 10

Minor: Big Data

Academic Head for non-profit initiative, Teach Code for Good.
